Acknowledgments

The author thanks Prof. Dr. Iftikhar Ahmed and Dr. Sami ur Rahman for supervision and feedback on earlier drafts.

Declarations

Funding. This work received no specific grant from any funding agency, commercial, or not-for-profit sectors.

Competing Interests. The author declares no competing interests.

Ethics approval. Not applicable. This study does not involve human participants or animals.

Consent to participate / Consent for publication. Not applicable.

Data availability. The aggregated result dataset is publicly available on Kaggle at https://www.kaggle.com/datasets/jakenty1/prompt-framing-experiment. Prompt templates, task metadata, evaluation scripts, analysis notebooks, and aggregated result files are maintained in the public project repository at https://github.com/tycoi2005/prompt-framing-experiment.

Code availability. All analysis scripts used to generate the manuscript tables and figures are available in the project repository at https://github.com/tycoi2005/prompt-framing-experiment (directory 10Paperv3/scripts/).

Authors' contributions. Duc Toan Huynh: conceptualization, methodology, software, investigation, data curation, formal analysis, writing – original draft, writing – review and editing. (Single-author manuscript.)

Use of AI tools. AI tools were used for editing support, code assistance, and drafting assistance during manuscript preparation. The experimental outputs were generated by the evaluated models and were not manually altered for the reported analyses. (Declared per the journal's LLM policy; AI-assisted copy editing itself need not be declared.)
